

Figure 1 is a line graph showing the percentage of total population in different age groups (0-14, 15-64, 65+) for various countries from 1950 to 2050. The Y-axis represents the percentage of total population (0 to 100), and the X-axis represents the year (1950 to 2050). The graph shows a general trend of decreasing population in the 0-14 age group and increasing population in the 65+ age group, particularly for developed countries.
